1- Download your files

To download our files, please access our Google Drive and click on the dropdown arrow to initiate the download process. We recommend bookmarking the page as we frequently update our packs, making it easier for you to access them in the future!

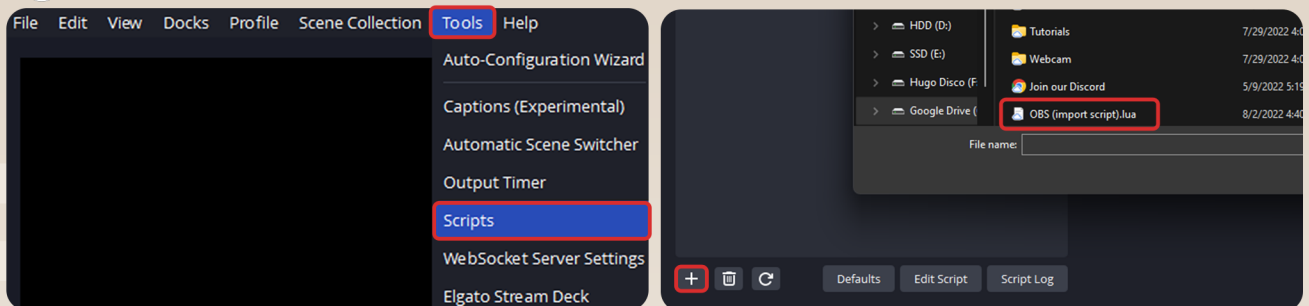

YOUR SOCIAL SPACE
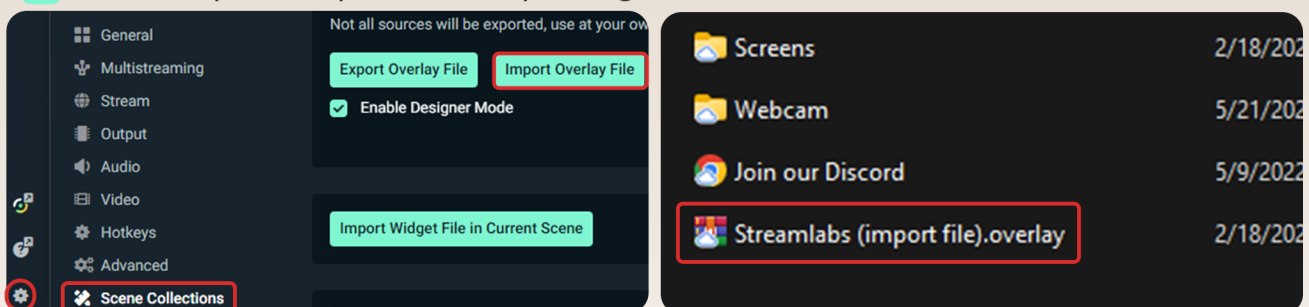

2- Import our work

We have a plethora of videos on our YouTube channel that teach you how to import overlays, configure our packs, and provide general streaming tutorials. Alternatively, you can use our brand-new script, which will speed up the process of importing everything.

How to import our packs via script using OBS:

How to import our packs via script using STREAMLABS:

3- Join our Discord

Join our Discord community! Our focus is on building connections and growing together. In our community, you can share your stream, learn about the latest Twitch updates, and access a category dedicated exclusively to tutorials where you can find every tip available on the internet related to streaming.
